

PEHero

Your Private Equity AI Agent Squad.

Sourcing · underwriting · diligence · capital · portfolio operations

What you'll see

Six product surfaces, in order of a deal's life.

01	Chat — your Private Equity AI Agent Squad on call	triage, LBO modelling, IC memo, VDR audit
02	Pipeline — kanban across every deal stage	sector + ownership filters, click into a deal
03	Deal detail — brief on the right, chat in the centre	LTM, top customers, DD findings, LBO returns
04	Analytics — ask in English, get a chart	sector multiples, stage counts, LP mix
05	Instructions — tune how each specialist thinks	edit in-app, changes land on the next conversation
06	Extensions — live web + local registries	sourcing beyond your CRM, Baltic registry lookups

One chat, every PE specialist

Type a prefix or plain English — PEHero picks the right agent.

- Left: your sessions, the full agent squad, and Pipeline / Instructions / Analytics.
- Centre: the conversation. Contextual sample prompts appear right under the input.
- Right: tables, citations, memo previews stream in as the agent works.
- A live 'thinking' indicator shows what's happening behind the scenes.

Empty chat with contextual prompts

Deal Triage — go / no-go in 90 seconds

A quick decision backed by comps and market signals.

- Type 'triage:' or describe the deal in plain English.
- The agent pulls comparables and sector context on its own.
- Returns a clear verdict, a three-bullet rationale, and a concrete next step.
- 'Next step — X' surfaces a follow-up button to keep the thread moving.

LBO Model Builder

Full 5-year model and sensitivity from one sentence of assumptions.

- Normalises seller financials with standard QoE add-backs.
- Projects revenue, margin, capex, interest, free cash flow and debt paydown.
- Returns IRR, MOIC and a value-creation bridge — kept on hand for re-use.
- Year-by-year table appears in the right pane, editable by asking for changes.

IC Memo Writer

An investment-committee memo, drafted from the deal's own data.

- Pulls the deal brief, LTM financials, LBO model, debt stack, comps and findings.
- Drafts full sections: thesis, market, financials, value-creation plan, risks, recommendation.
- Every quantitative claim is sourced from the deal — no invented numbers.
- IC length by default; ask for a one-pager and it re-writes accordingly.

IC memo generated from the deal data

Live news feed

PE-relevant headlines from FT, Bloomberg, WSJ, Reuters, BBC — right where you work.

- RSS aggregation from 7 financial news sources, refreshed every 5 minutes.
- Titles auto-translated to your session language (LT, ET, FI, SV).
- Click any headline to read the full article.
- Tables and data from agent tools now render inline — no context switch.

News feed alongside the chat

Kanban across every deal stage

Sourced → Closed / Held / Exited — every live target on one board.

- Each card shows sector, LTM revenue and EBITDA, ask EV and multiple.
- A heat dot on the card reflects seller intent — cold, warm or hot.
- Sector and ownership chips filter the board in a click.
- Click a card to open the full deal workspace.

Full pipeline kanban

Every deal has its own workspace

Brief on the right, chat in the centre, artifacts stream in as the squad works.

- Right pane: HQ, LTM financials, top customers, DD findings, margin and multiple.
- Centre: per-deal chat. Ask 'triage this', 'draft the IC memo', 'show DD findings'.
- Any specialist can be invoked without ever leaving the deal.
- New artifacts from tool calls land alongside the brief as they arrive.

Single-deal workspace

Company search

Fuzzy name search and sector filter across your entire company database.

- ILIKE fuzzy matching — search by partial name, city, or sector.
- Revenue, EBITDA, employees, and deal stage at a glance.
- Click any company to jump to its deal workspace.
- Sector filter narrows to healthcare, logistics, software, etc.

Company search with sector filter

Ask in English, get a chart

Analytics that read the same data your deal team does.

- Natural-language questions run read-only against your deal data.
- The right chart and title are picked automatically from the result.
- Curated sample questions seed the experience for first-time users.
- The underlying query is shown under every chart — fully auditable.

Tune the squad, live

Every specialist's instructions are editable — from the same interface.

- Each role has its own set of instructions, plus a shared PE glossary.
- Edits save in-place and take effect on the very next conversation.
- No restarts. No deploys. Just change how the squad thinks and carry on.
- Perfect for onboarding a partner's preferred memo style or diligence approach.

The full squad, editable

Editing the Deal Triage instructions

Workflow, tone and output format — all in one view.

- Rewrite a specialist's instructions the way you'd brief a new associate.
- Shared PE context is applied automatically so you don't repeat yourself.
- Versioned alongside the product so changes are auditable.
- Great for encoding your house style once and letting it apply everywhere.

Editing a specialist's instructions

LET'S TALK

See PEHero on your deals.

Book a 20-minute walkthrough. We'll load one of your recent deals into PEHero and show you the full agent flow — live.
